DETAILED ACTION

Allowable Subject Matter

Claims 2, 3, 7-26, 31-46, 48, 49, 53-72, 77-92, 94, 95, 99-118, 123-140 (renumbered 1-116) are allowed.

The following is an examiner's statement of reasons for allowance: Claims 2, 3, 7-26, 31-46, 48, 49, 53-72, 77-92, 94, 95, 99-118, 123-140 (renumbered 1-116) are allowed because a comprehensive search of prior art failed to teach, either alone or in combination, a decision-driven control loop comprising a data detector producing first and second early decision outputs, and processing circuitry receiving said first and second early decision outputs and producing a processing output to drive the decision-driven control loop, wherein said processing circuitry comprises a comparator, and wherein said first early decision output is initially used to produce said processing output to drive said control loop at least until said comparator compares said first and second early decision outputs, and if the comparison between said first and second early decision outputs indicates a difference, then any correction initially made to the processing output based on said first early decision output is undone, as the applicant has claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
